"Molecular cloning and sequencing of thioesterase B cDNA and

"Molecular cloning and sequencing of thioesterase B gene associated with

stimulation of expression of the thioesterase B gene associated with

hormonal induction of peroxisome proliferation.";

J. Biol. Chem. 268:14278-14284(1993).

-I-FUNCTION. Fatty acid product is achieved by hydrolysis of the thio

ester by a thioesterase. This thioesterase may be associated with

peroxisome proliferation and may play a role in the production of

3-hydroxy fatty acid diester pheromones.

-I-TISSUE SPECIFICITY: Highest levels in uropygial gland, much lower
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    This SWISS-PROT entry is copyright.
